THIS IS UNEVALUATED INFORMATION

50X1-HUM

1.

_____ treatments with a Soviet drug called Acrahim (also reported as Acrahio) to ward off malaria _____

50X1-HUM

_____ the dosage for this drug was one tablet per day for ten days followed by three days rest and a repeat of this treatment until a two month's period had elapsed. _____ this treatment would give _____ protection against malaria for one year. Aside from affecting the color of the skin, the drug has no other side effects.

50X1-HUM

50X1-HUM

2.

_____ there is a newer Soviet drug used for anti-malarial purposes which does not have the same effect of discoloring the skin, but that it is not as yet widely used.

50X1-HUM

Comment: _____

_____ this drug caused more intense icterus (yellowness) than Mepacrine (quinacrine) and gave a yellow-greenish tinge to the complexion.
